Anna Frederich, Ryan Stuntz, Maddie Severance, Rachel Rotteveel

6170 Final Project Team Contract

Expected level of achievement and effort for each team member
As a team, our goal is to receive an A on this project. Each team member will be expected to put in an equal amount of effort to achieve that goal. All members will be expected to pay attention to lectures.

Personal goals for each team member
Anna: To become more comfortable working with different database structures.
Rachel: Learn React and get better at routing.
Maddie: Learn React and put into practice the design fundamentals we've learned over the last few weeks
Ryan: To develop skills working with React as well as effectively designing the project early on. This way we will not have to change it more later on.

Frequency, length and location of team meetings
We plan on meeting as a group two times a week either on-campus or in one of our living groups for at least one hour to sync up. We will additionally be communicating daily through our group chat. We all live within a 5-minute walk from each other, so it will be easy to work with others on the project as our schedules allow.

How quality of work will be maintained
We will push our code every time a new feature is implemented so as to make sure the components that we are each working on can be merged quickly and easily. Additionally we will notify one another of each commit, so additional team members can look over their code and make comments/ changes if necessary. We will write unit tests on model functions and discuss major design decisions, like routing structure and schema design.

How tasks will be assigned, and what to do if deadlines are missed
Tasks will be assigned based on which team member has finished the current task they are working on, or has put in the least amount of work so far on the project. Additionally, if a team member has a particular desire to begin implementing a feature, then they will be assigned that task. If deadlines are missed, we will work extra hard to make up the work and get back on track.

How decisions will be made and disagreements resolved
Decisions will be made on a simple majority rule basis. In the case of a 2 way tie, we'll discuss the issue until we can reach a group compromise.
